

Dear Honorable Mayor and the Corvallis City Council,

My name is Nisha Sridhar and I am a senior at Crescent Valley High School and a member of the environmental club.

I support the **Corvallis Climate Recovery Ordinance** as proposed by the Oregon Sierra Club and Our Children's Trust. As a millennial, I understand that failure to act now to stem climate change could affect the planet that we leave for my generation and future generations. We need local government leaders to support meaningful laws that spur climate action. Now is the time to take action.

This is why taking action to combat climate change today is important to me:

When I moved to Corvallis from Buffalo, New York the first thing that struck me about Corvallis is the amount individuals care about the environment. I strongly believe that Corvallis should continue to strive to protect its environment because all though we are just one small town - we caused the stage for future action by other cities, states, and countries.

Please support the Corvallis Climate Recovery Ordinance so Corvallis can stand as a national and international leader for climate action and intergenerational rights.

Thank you for your service to the City of Corvallis.

Sincerely,

Nisha

Complacency  
is not an  
option!
