

Dear Honorable Mayor and the Corvallis City Council,

My name is Sophie Fisher and I am a student at Crescent Valley High School and a member of the SEA club.

I support the **Corvallis Climate Recovery Ordinance** as proposed by the Oregon Sierra Club and Our Children's Trust. As a millennial, I understand that failure to act now to stem climate change could affect the planet that we leave for my generation and future generations. We need local government leaders to support meaningful laws that spur climate action. Now is the time to take action.

This is why taking action to combat climate change today is important to me:

Combating climate change is important  
to me because I want all the natural  
wonders of the Earth to be around  
along time.

Please support the Corvallis Climate Recovery Ordinance so Corvallis can stand as a national and international leader for climate action and intergenerational rights.

Thank you for your service to the City of Corvallis.

Sincerely,

Sophie Fisher
